- There are 12 points possible on this proficiency: one point per problem with no partial credit.
- You have 30 minutes to complete this proficiency.
- No aids (book, calculator, etc.) are permitted.
- You do **not** need to simplify your expressions.
- For at least one problem you must indicate correct use of a constant of integration.
- Circle your final answer.
- **1. [12 points]** Compute the following definite/indefinite integrals.

$$a. \int 7\cos(x) + \pi^6 - \sqrt{x} \ dx$$

$$b. \int \sec^2(7x) \ dx$$

$$\int \sec^2(7x)dx = \int \frac{1}{7} \sec^2(u)du$$
