§2.3 Starter notes.

- Build up knowledge on a solid foundation
- Know how to find limit given a graph.
- <u>Example</u>: $\lim\limits_{x \to 5} 2x + 3 = \boxed{\textcolor{red}{13}}$

rational
for now (2.1, 2.2)

- <u>Clever 2.3 Observation</u>: $\lim\limits_{x \to 5} 2x + 3 = 2\left(\textcolor{red}{5}\right) + 3$

One can obtain the answer
by substitution.

Why should we treat this with
Suspicion ?? !
